

Staying safe in the Covid-19 era

We have been working hard to ensure that our boats are safe environments for both you, our loyal customers, and our dedicated and hard working staff. We will always follow current government advice and have put together a list of promises that we have made, as well as some things we need you to do, to ensure we all stay as safe as possible.

We will

thoroughly clean the boats before you come on board and regularly clean tables and key touch points while you are on board

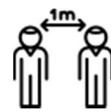

provide hand washing facilities and hand sanitiser on board

provide staff with appropriate PPE to keep both them and you safe

reduce the number of people allowed on to ensure social distancing is possible

ensure tables are an approved distance apart

implement one-way systems wherever possible

keep windows and doors open (weather permitting) for a good flow of fresh air

We need you to

NOT come on board our boats if you or anyone in your household has symptoms of the virus

maintain social distance whenever possible

wash your hands regularly

pay by contactless or card if possible

notify us if you become unwell with COVID-19 symptoms up to 14 days after being on board

These measures will mean we can all enjoy being on board our boats while staying safe. Thank you for your cooperation.
